El valor bruto de activos (GAV) se sitúa en € 12.630 millones, con una revalorización LfL del 4,7% impulsada principalmente por el Plan MEGA. El valor neto de activos asciende a €8.660 millones (€15,36 por acción, +7,3% vs 2024).

El nivel de endeudamiento ("LTV") se sitúa en 28,9%, con una posición de liquidez de €1.965 millones. El 100% de la deuda es a tipo fijo y el vencimiento medio es de 4,4 años.

Evolución del negocio

En **oficinas** la compañía continúa creciendo en ingresos comparables (+3,5%) y en las renovaciones de renta (+4,8%), impulsados por el excelente comportamiento de Madrid y Lisboa. La ocupación acaba en máximos históricos, alcanzando el 94,2%. Fuerte actividad de prealquiler, con 56.000 m^2 firmados en 4 proyectos de reforma en Madrid y Lisboa.

La cartera **logística** sigue generando crecimiento, con un aumento de las rentas comparables del +1,5%, fuerte incremento de rentas en renovaciones (+5,8%) y manteniendo la ocupación en niveles muy elevados (96,4%).

En el año se ha entregado a Total una nave en Cabanillas Park II que cuenta con 18.131 m^2. Del total de la cartera de suelo disponible para desarrollo (461.000 m^2), 175.000 m^2 se encuentran prealquilados o con cartas de interés firmadas.

Continúa el excelente rendimiento operativo en **centros comerciales**, con importantes crecimientos de ingresos comparables (+4,7%) y de renta en las renovaciones (+6,7%). La tasa de esfuerzo sigue en mínimos históricos (11,0%) y las afluencias (+2,1%) y ventas (+6,6%) en niveles superiores a 2024. La ocupación acaba en máximos históricos (97,0%).

Respecto a la Fase I (64 MW) de desarrollo del plan MEGA, los **data centers** de Madrid, Barcelona y el País Vasco contaban a cierre de ejercicio con 58 MW IT equipados y listos para operar. Una vez completada la repotenciación (+6MW) de Barcelona en este 1Q2026, la fase I ya está completamente alquilada y se espera que contribuya a la Compañía con unas rentas estabilizadas en 2027 de €97 millones.

En cuanto a la Fase II (254 MW), las obras avanzan según lo previsto. Se ha pre-alquilado al completo el segundo data center del País Vasco, con 48MW de capacidad IT, un año antes de la entrega. Es el mayor contrato de data center firmado en Península Ibérica. En diciembre se obtuvo la licencia de construcción del tercer edificio del País Vasco (48 MW) y comenzaron las obras de construcción. En Lisboa (2 DCs de 40MW cada uno), las obras progresan conforme a plan, siendo ya visible la estructura. Respecto al segundo data center en Getafe, Madrid (48MW), las obras de demolición continúan a buen ritmo y se ha solicitado licencia de construcción. Por último, en Madrid Tres Cantos (30 MW) se ha solicitado permiso de urbanización para la parcela.

Valor de la cartera de activos

El valor bruto de los activos (“Gross Asset Value” o “GAV”) de MERLIN asciende a €12.630 millones a 31 de diciembre de 2025, según tasaciones realizadas por Savills, CBRE y JLL. Ligera expansión de los *yields* (+4 pbs) en la cartera de activos tradicionales. El valor neto de activos asciende a €8.660 millones, equivalentes a €15,36 de EPRA NTA por acción.

Perspectivas 2026

Se estima un FFO estable respecto a 2025 (€0,58 p.a.), ya que la disminución de ingresos financieros sumada al aumento de gasto por intereses, compensarán el previsible crecimiento de los ingresos. Respecto al dividendo, se propondrá una distribución de €0,44 p.a. con cargo a 2025, de los cuales €0,20 p.a. fueron pagados en diciembre.
